Fine Art Printing

For when you need the best print quality available with the largest choice of paper surfaces. All paper types in this category are archival. Best results are achieved with 16 bit TIFF files saved in the Adobe98 RGB colour space.

Pearl and Glossy Traditional photographic papers.

Fine Art Rag Cotton based papers with a matte finish with varying degrees of surface texture. Painterly effect. Your choice of Hahnemuhle Smooth Rag, German Etching or William Turner.

Metallic High gloss paper with an almost 3D depth. Silver in the paper reflects light to make your print shine.

Mounting & Laminating

Protect and prepare your prints for display with these mounting and laminating options.*

Foam Core Inexpensive. Available in white and black. Will warp over time if not put into a frame.

Mighty Core Dense mounting material better for small, non-framing applications.

Sintra Plastic mounting material. Will not warp.

Laminate Fine Art UV laminate in Satin or Glossy options for Pearl, Glossy and Metallic papers, and Matte laminate for Fine Art Rag papers.

*Cost of print not included

Ready to Hang

Museum Float Pearl paper with a satin lam mounted to Sintra with a frame on the back. Floats away from the wall. Very simple and clean look. Light. Will not warp.

Fine Art Float Adds our selection of fine art papers to the Museum Float.

Wall Mount A simple way to get your print on the wall. Pearl paper with satin lam. Mounted to Mighty Core. Large sizes not recommended, as foam board may warp.

Metal Sublimated directly onto sheets of metal. Glossy finish. Choice of clear or white coating. Clear coating shows metal grain under image. White coating shows truer colour at the expense of the "metal look". Only available in listed sizes.
